MKTG 0001: Viral Marketing

Course Description & Objectives

Why do some products catch on and become popular while others fail? Why do apps and services take off while others languish? And why do certain ads, messages, or ideas stick in memory while others disappear the minute you hear them? Diffusion, social media, word of mouth, and viral marketing have become important topics for companies, brands, and organizations. Marketers want their product to be popular, organizations want their social change initiative to catch on, and entrepreneurs want their ideas to stick. This course investigates these and other topics as it explains how things catch on and become popular.

In this course, you'll learn why things catch on, and how to make your own ideas more successful.

- Characteristics of products, ideas, and behaviors that lead them to be successful.
- How psychological processes shape social epidemics.
- How interpersonal processes or interactions between individuals drive success.
- Social networks, or how patterns of social ties influence success.

Course Overview

This course is divided into 5.5 weeks. Course content is delivered via video lectures, synchronous class sessions and online assignments, discussions and exercises.
