2. Distribute the “Think Pair Share” activity guide to students.
   1. Use the vocabulary PowerPoint to review the different card types (Credit card, store credit card, charge card, debit card, prepaid / gift card) and encourage students to take notes on the review guide.
   2. Students use the resource bank to complete the Venn diagrams to exhibit the similarities and differences between credit cards, store credit cards, and charge cards; debit cards, prepaid / gift cards.
   3. Students use the resource bank to note advantages and disadvantages of each type of card.
3. “Think” – Students initially complete the activity guide individually. “Pair” – Pair the students so they can trade and discuss each review guide and make any necessary edits following the discussion. “Share” – Ask some partners to share what was learned about a specific card type. Partners can use their notes to present.
